

VELA SAMBA

FOCUSING ON A HEALTHIER BACK

THE VELA SAMBA SERIES IS A RANGE OF STANDING CHAIRS AND STOOLS FOR BETTER ERGONOMIC SEATING AT HOME OR AT WORK.

VELA Samba chairs have a small, compact five-wheel base, which is available with different types of castors. Seat and back support an active sitting and standing position – some even increase movement and stimulate and train the back. VELA Samba chairs are simple, versatile chairs for active people, ideal for e.g. hospitals, clinics, dentists and opticians – for the professional staff and for everybody else who shift between sitting and standing. VELA Samba chairs are recommended for the therapy ward or clinics where people need very low or high seats and also need to move around. VELA Samba chairs are used for active sitting, which promotes a healthier back.

The design focuses on ergonomics, safety and VELA's high quality standards. Moreover, the chairs have been developed to comply with all applicable requirements and standards.

VELA SAMBA STOOLS:

VELA Samba 400 has a unique saddle seat supporting an open hip angle and ergonomic sitting posture. The adjustable seat angle promotes an active sitting posture.

VELA Samba 410 has a unique, dynamic seat. It is eminently suited for the office, the therapy ward, the clinic or for home use. The seat improves movement in your lower back along with the tilt and rotation of the pelvis, and it stimulates muscles and joints. The dynamic movement stimulates and strengthens your back and lumbar area in the sitting position.

VELA Samba 500 has a small, round seat and model 510 and 520 have a backrest too. The seat may be lowered right down to 38 cm, which is well suited for the use in nursery schools, therapy centres and other places where staff members need to work close to the floor. For use in hospitals, clinics (including dentists' and opticians' clinics), the seat may be set very high – up to 86 cm.

VELA SAMBA STANDING CHAIRS:

VELA Samba 100, 110, 120, 130 are standing chairs supporting an active sitting position as well as a semi-standing and standing position. The height adjustment and tilt of the seat combined with the adjustable backrest support an open hip angle and thereby an active sitting position.

VELA Samba standing chairs reduce the pressure on the back and promote mobility of hands, shoulder, neck and head. They are simple, safe and active work chairs recommended for industry and office use as well as for clinics, laboratories and home use – to get closer to the desk and for height-adjustable work tables too. The small base of these chairs makes it easy to store them when not in use and for clinical staff to treat patients while seated.
