

VARIANT: 100, 110, 120, 130 & 400

VELA Salsa 100 with a short ergonomic curved seat with rounded front edge for support and stability of the user.

VELA Salsa 100

VELA Salsa 110

VELA Salsa 110 with an ergonomic curved seat with rounded front edge and raised pommel for support and stability of the user. The pommel also prevents the user from sliding down the seat, when tilted.

VELA Salsa 120 with an ergonomic V-shaped front - promoting an active sitting posture and a healthy back.

VELA Salsa 120

(The footrest is an accessory)

VELA Salsa is a series of sit-stand chairs with a central brake. The chair promotes the user's independency at different activities, because of a safe, high workplace. VELA Salsa sit-stand chairs promote good ergonomics and are perfect as a second chair throughout a varying work day with sitting and standing tasks at home and at the workplace.

VELA Salsa provides extra safety and stability for the user. A tilted seat supports a healthy posture with an open hip angle and free movement of shoulders and arms e.g. when doing kitchen tasks and working up high.

Stable armrests and a central brake secures safety while getting up and sitting down in the chair. This is an advantage for users with mobility and balance problems. Brake and armrests also provide support when changing the sitting position.

VELA Salsa chairs allows an extra low sitting height, e.g. for the user to help children getting dressed. The chair also comes in a high version, which is optimal when the user is ironing, cooking or for placing dishes in the cupboard.

Adjustment of the seat height, depth and tilt plus backrests and armrests ensures the best conditions for an ergonomic sitting position. This provides support and stability for many activities.

BENEFITS

- :: VELA Salsa is suitable for sitting as well as standing work, for people with disabilities due to e.g. arthritis, back diagnoses and walking-impairment
- :: Good ergonomics and support ensure an optimum sitting position when working at home and at work
- :: A central brake ensure safety when getting into and out of the chair
- :: It is possible to 'walk' the chair while sitting down
