

VELA Hip Hop 100

VELA Hip Hop 100 has an E-seat as standard with a cavity with foam panels that can be reversed or changed, optimising sitting support for the child. Seats and backrests on VELA Hip Hop 100 are available for very young children (width 25 cm).

VELA Hip Hop 100 is also available with a footplate. Enabling a child to have their feet on the "floor" helps them to remain still in a sitting position and offers greater safety, as the child cannot rock the chair.

VELA Hip Hop 100

VELA Hip Hop 100

with footplate

VELA Hip Hop 100 is an activity and school chair for children with a disability or special needs, for use in school or nursery and at home. One of the chair's distinctive features is its simple design, which enables children who have difficulty concentrating to more easily maintain focus. VELA Hip Hop 100 has a unique braking system that ensures a stable and directional seat, creating a good starting point for participation and learning.

VELA Hip Hop 100 is a safe chair for children with special needs. The chair supports inclusion in the case of less severe physical or mental disability, as a good sitting position and a central brake help to focus the child's attention in school or nursery and at home.

The adjustable features available to the child are limited to the brake and seat height, which is ideal if the child is unable to sit still or is easily distracted in class. This helps the child to stay focused and to participate in group activities and so enhances learning and skills development.

VELA Hip Hop 100 is equipped with four directionally-stable, smooth-running castors, enabling the chair to be used as a "walking" aid, for example if it needs to be used in different classrooms. The armrests and the backrest, the depth of which can be adjusted, ensure a good sitting position, even when very little seat depth is required.

The option to adjust the chair's seat height, depth and tilt, as well as the back- and armrests, creates the best possible conditions for an ergonomic sitting position that provides comfort and support. The height of the chair is adjusted using a gas spring, making it eminently suitable for children who can stand up and sit down without assistance.

ADVANTAGES

- :: Various seats and backs can be combined to meet the child's needs, and to reduce movement in the case of concentration difficulties, for instance
- :: A stable base and a central brake provide additional safety and security, for example during activities or when the child has to stand up
- :: The chair's functions are easy to understand and help with stability and focus
- :: Option for extra short seat depth and width – as little as 25 cm
- :: Good ergonomics, support and comfort for the best possible sitting position, which encourages activity and participation

STANDARD CONFIGURATION

User weight	60 kg (132.2 lbs)

All VELA chairs are CE-marked and comply with applicable standards.

VELA Hip Hop is supplied upholstered in black Mionetta Satch fabric as standard, which is very durable and also water-repellent. VELA has its own upholstery workshop that always stocks more than 300 types of foam, textiles and colours. If you require materials that are very easy to clean, VELA offers a large selection of artificial leather, or the option of various seat covers.

ACCESSORIES AND SPECIAL SOLUTIONS

All VELA children's chairs can be ordered with a large selection of accessories and special solutions, enabling the chair to be adapted to the needs of the child, e.g. thigh supports, body supports and stabilising harness and ankle straps. VELA can also offer individual solutions within padding, comfort, support and handles.

VELA has a wide range of seats and backrests that can be customised as bespoke solutions. These can be adapted with cutouts in the cushion or by modifying the seat or backrest with wedges or inserts.

A complete list of accessories is available at www.vela.eu.
